The Model MA36S Multi-Turn Absolute Encoder offers a high performance solution for your absolute feedback needs. It provides maintenance-free feedback thanks to its innovative battery-free and gear-free multi-turn technology. This encoder is especially suited for applications where position information must be retained after loss of system power (i.e., system resets, outages, etc.). Its rugged magnetic technology and high IP rating make the Model MA36S an excellent choice, even in the harshest industrial environments. Available with a 1/4" or 6 mm shaft and a servo mount, the Model MA36S is easily designed into a variety of applications.

**Common Applications**
- Robotics
