The Model 58TP Programmable 58 mm Accu-CoderPro™ thru-bore encoder is specifically designed for the challenges of an industrial environment. Its advanced set of electronics allow the encoder to be programmed to meet your exact application needs. Using EPC's optional programming module, users may select the output type, 32 different waveforms, and any resolution from 1 to 65,536 CPR – that's 262,144 counts using 4x quadrature counting. These programming features allow a single encoder to be configured for multiple applications, enabling one encoder to replace many different part numbers – and that provides cost savings on inventory and down-time replacement. The 58TP can also be configured and shipped with specs pre-programmed, with no on-site programming needed.

COMMON APPLICATIONS

Motor Control, Conveyors, Elevator Controls, Machine Control, Food Processing, Process Control, Robotics, Material Handling, Textile Machines and all types of Motion Control Feedback

NOTES:

- Programmable feature using Field Programming Software, USB Programming Module, and Interface Cable. For more information, see [EPC Field Programming Software User Guide](#) at encoder.com.
- Open Collector (OC) and Pull-Up Resistor (PU) outputs not recommended for CPR > 8192 and/or frequencies > 150 KHz.
- If ordered with initial output type of either H5 or P5, encoder cannot be programmed to OC, PP, or HV output types.
- 7-pin MS Connector does not provide Index Pulse Z when selected output is Line Driver (HV or H5).
- 5-pin M12 Connectors only available with Pull-Up, Open Collector, and Push-Pull output types.
- For non-standard English cable lengths enter 'F' plus cable length expressed in feet. Example: F06 = 6 feet of cable. For non-standard metric cable lengths enter 'M' plus cable length expressed in meters. Example: M06 = 6 meters of cable. Frequency above 300 kHz standard cable lengths only.
