

MODEL 711 - INCREMENTAL SHAFT ENCODER

FEATURES

The original industry-standard Cube
 Versatile housing styles
 Unidirectional output
 Resolutions available to 10,000 CPR

The Model 711 Accu-Coder® is the original, industry standard cube encoder. Designed for compatibility with most programmable controllers, electronic counters, motion controllers, and motor drives, it is ideally suited for applications that require a simple, symmetrical, unidirectional square wave output in a single channel format. Critical performance specifications for the most popular resolutions and advanced Opto-ASIC circuitry – a single chip design that eliminates many board level components – increase the reliability of an already dependable and durable encoder. With new options continually being added, the Model 711 excels in a wide variety of industrial applications.

COMMON APPLICATIONS

Feedback for counters, PLCs & motors, measuring for packaging, filling & material handling machines, wire winding, film extrusion
